 SCITON®
BECAUSE RESULTS MATTER

Clear Suite

Sciton is excited to provide you with a comprehensive vascular solution for your practice combining laser and light to treat a myriad of indications all year long on all skin types.

This not only further elevates the JOULE® platform as the most customizable laser and light platform in the industry, but also ensures a continuous revenue stream and great Return on Investment for YOU!

“

I have used 1064 Nd:YAG for years and I find the ClearSilk® in combination with BBL® HERO™ to be a superior choice for treating rosacea. The combination boosts the effect on the control of flushing and inflammatory flare-ups. No other system offers me the versatility that my JOULE provides.

Antonio Voegeli-Campo, MD, PhD

“

Sciton's ClearV® is the new gold standard for vascular treatments! It's unique Subsurface Vein Illumination allows me to clearly see veins below the surface and even treat feeder veins I can't see for a more complete and precise treatment. Coupled with integrated cooling and adjustable spot sizes, ClearV makes the treatment much more comfortable for the patient and easier for the provider.

Antonio Voegeli-Campo, MD, PhD

“

As a dermatologist I appreciate having an entire arsenal of modalities in one platform to treat multiple skin conditions. The Clear Suite in combination with BroadBand Light offers me an unmatched capability to treat vascular lesions and improve the signs of sun damaged skin.

Sherrif F. Ibrahim, MD

The Clear Suite 1064 Nd:YAG applications – ClearV and ClearSilk – combined with BroadBand Light (BBL) offer you the unique capability to treat vascular lesions and revitalize skin from a single platform.

ClearV[®]

Treat the Veins You Can and Can't See!

ClearV[®] is the preferred choice for vascular treatments. It effectively and safely treats visible vessels, broken capillaries, spider veins, vascular lesions, and skin discoloration. Gently treats undesirable, visible micro-vessels and resistant, unwanted subsurface vessels by applying targeted heat to stimulate the body's natural processes to clear away.

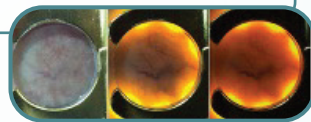

Technology

VascuZoom

Enables quick and easy spot size changes directly on the handpiece. This enables the user to switch effortlessly between 2-6 mm spot sizes.

Subsurface Vein Illumination (SVI™)

SVI technology is designed to give the provider enhanced visibility to see subsurface and feeder veins to treat more thoroughly and effectively. Push button controls on the handpiece offer the ability to change the lighting color, level of brightness, and aiming beam intensity.

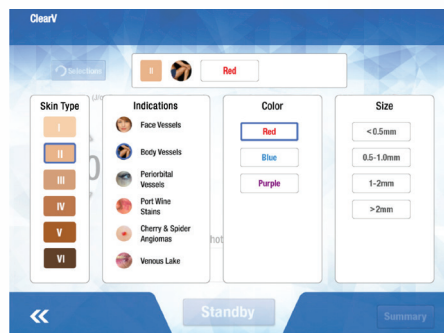

Adjustable Integrated Cooling

Sapphire tip provides optimal cooling pre, during and post as well as bulk cooling for patient comfort. The adjustable cooling range of 5-25 °C is ideal for treating a variety of vascular conditions safely, efficaciously, and efficiently.

Indication Driven Software

Allows to easily determine treatment range and safe start parameter settings.

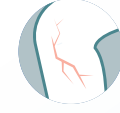

Indications

REDNESS, i.e. DIFFUSE REDNESS AND ROSACEA

FACIAL VESSELS

BODY VESSELS

PERIORBITAL VEINS

PORT WINE STAINS

CHERRY & SPIDER ANGIOMAS

VENOUS LAKES

ClearV Benefits

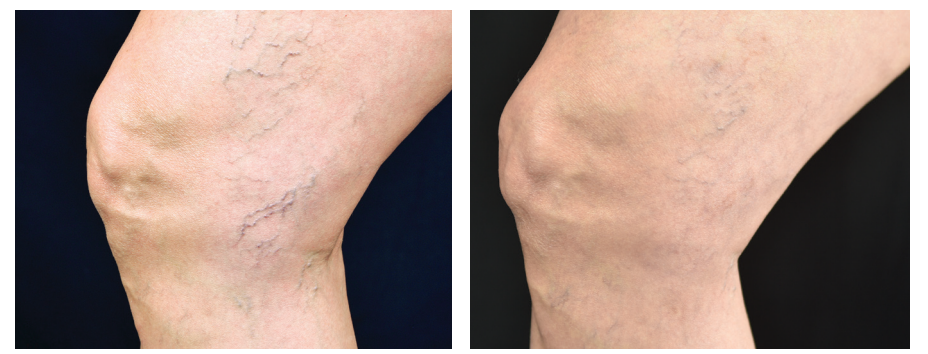

Better visualization and control through SVI™

All Fitzpatrick skin types

No disposables

No patient downtime – treat all year long

Easily combine with BBL HERO and other Sciton modalities

ClearSilk®

Boost Skin Revitalization

The ClearSilk® treatment works by deposition of heat, stimulating fibroblast activity and the body's natural repair process resulting in a decrease in fine lines and wrinkles. ClearSilk is the treatment of choice for all skin types. Patients have no downtime and may resume daily activities immediately following treatment.

Technology

Built-in Temperature Sensing

Easily visualize the skin temperature as you are treating with the built-in sensing gauge that indicates temperature ranges between 32-48 °C.

Audible Feedback

The ClearSilk handpiece and JOULE® system deliver audible alarms to provide real time feedback on the number of pulses delivered.

Visual Distance Guide

Enable user to maintain consistent treatment distance to target for uniform heating to ensure reliable results.

Indications

REDNESS, i.e. DIFFUSE REDNESS AND ROSACEA

FINE LINES AND WRINKLES

PIGMENTED LESION

ACNE SCARS

ClearSilk Benefits

All Fitzpatrick skin types

Easily delegatable

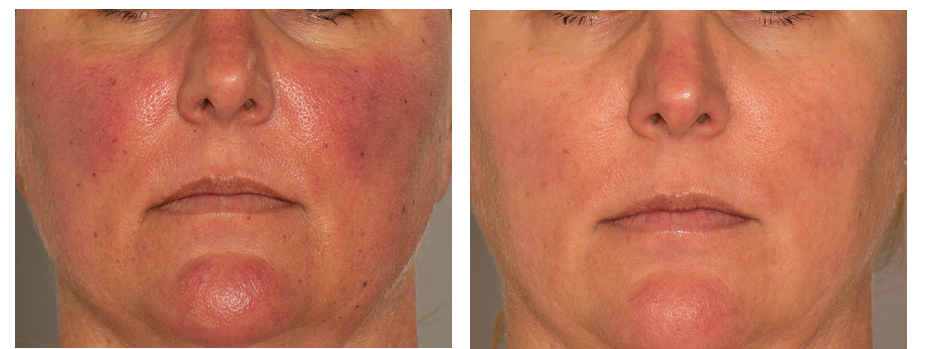

Zero downtime

No anesthetic or disposables required

Comfortable with minimal patient discomfort

Non-ablative, and non-contact

4-6 treatments recommended to achieve optimal results

COMBINATION TREATMENT & SPECIALTIES

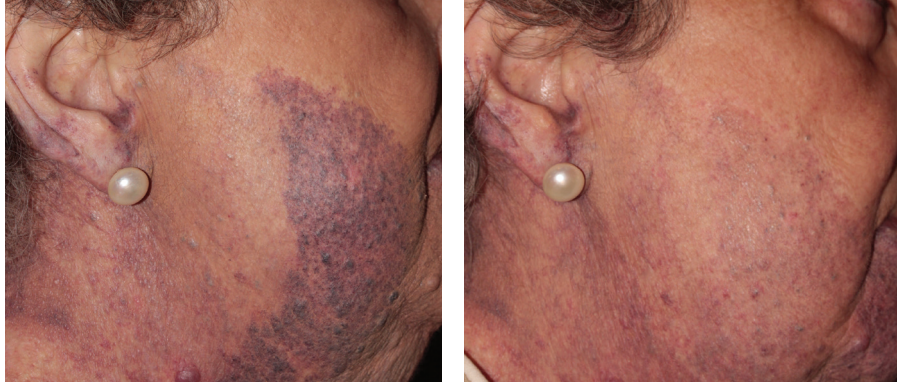

ClearV® and ClearSilk® are highly versatile and can easily be combined not only

with BBL®, but with many other Sciton modalities.

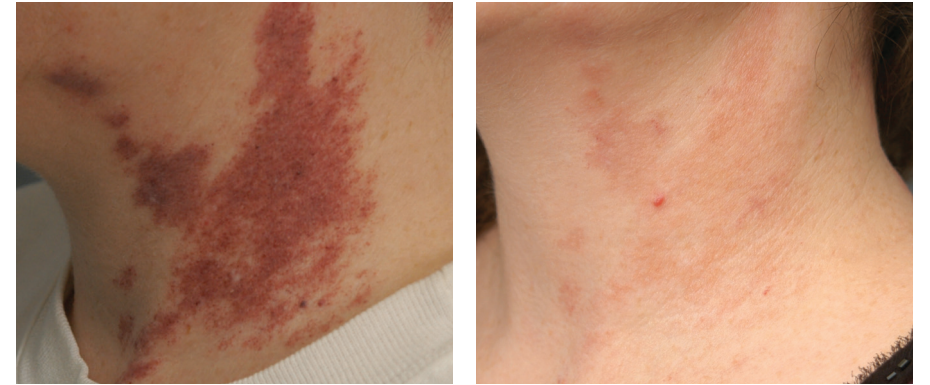

ClearV + BBL

ClearV and BBL together provide a great tool

and valuable solution for complex vascular conditions, such as Port Wine Stains.

ClearSilk + BBL | post 2 tx | courtesy of Antonio Campo-Voegeli, MD, PhD

In addition, the ClearV and ClearSilk handpieces can be used to treat other nail and the nail bed resulting in a decrease of nail fungus and improve nail

conditions, such as warts and onychomycosis. The laser energy heats the growth and appearance.
